Exploring Science 7 C: Sample Quick Quiz Questions and Answers

Below are some sample questions commonly asked in quick quizzes, along with detailed answers.

Question 1: What is the process by which green plants make their own food?

Answer:

The process is photosynthesis.

Photosynthesis occurs in the chloroplasts of plant cells, where sunlight is used to convert carbon dioxide and water into glucose (a form of sugar) and oxygen. The general equation for photosynthesis is:

\[6CO_2 + 6H_2O + light \ energy \rightarrow C_6H_{12}O_6 + 6O_2 \]

This process is fundamental for the survival of plants and indirectly supports all living organisms by providing oxygen and food.

Question 2: Name the three main parts of a plant and their functions.

Answer:

The three main parts are:

- Roots: Absorb water and minerals from the soil; anchor the plant.
- Stem: Supports the plant; transports water, minerals, and food between roots and leaves.
- Leaves: The site of photosynthesis; produce food for the plant.

Question 3: How are mammals classified? Name three characteristics of mammals.

Answer:

Mammals are classified based on traits such as the presence of hair or fur, mammary glands, and being warm-blooded.

Characteristics:

- Have hair or fur on their bodies.
- Possess mammary glands that produce milk for their young.
- Are warm-blooded, maintaining a constant body temperature.

Question 4: What are the three states of matter? Provide an example of each.

Answer:

The three states of matter are:

- Solid: Definite shape and volume. Example: Ice.
- Liquid: No definite shape but definite volume. Example: Water.
- Gas: No definite shape or volume. Example: Oxygen.

Question 5: Describe the principle of a lever as a simple machine.

Answer:

A lever is a rigid bar that pivots around a fixed point called the fulcrum. It operates on the principle of mechanical advantage, allowing a small effort to move a larger load.

Components of a lever:

- Effort: The force applied.
- Load: The resistance or weight to be moved.
- Fulcrum: The pivot point.

Example: Using a crowbar to lift a heavy object.
